Jane, you found something very interesting. Some of those drawings relate to our Superfund sites and some go back to the 1980s. Before the times of computers, scanners, SDMS and SEMS.

I think those are records that should be kept and added to the site files in SEMS/SDMS.

Please, check with Nancy Yarberry the best way to preserve these.

Some of those maps relate to our Superfund sites and were used by RPMs that already retired long time ago.

Hi all - When Vince and I were hunting for the light table we found that there are numerous maps for our sites. Cindi has provided the attached inventory list for us to see what needs to be kept and we will need to determine how to go about keeping them. We also need to find out where to move the light table to.

I'll let Lydia know that you guys are planning to take the light table away. Before we decide to move Vince's maps, let's talk again.
